

Presidents Project

Department President, Joyce Willis has chosen as her Project this year "Hospice Units at the VA Medical Centers in North Carolina". As President Joyce has stated these units are just being developed at the four VA Medical Centers. The President's Project Committee will be working toward making this Project a reality with the help of you and your Units. We want to be able to make the rooms at each hospital more comfortable for the patients and their family members - make the décor more like a home not a hospital room. As you know when hospice is steps in they want to make the patient and family members as comfortable as they can, and with our help we can make this happen.

Our first obligation is to our veterans and their families and this project is a chance for our Department to make a difference in the lives of those veterans that need this service.

Because of the nature of the Project, your Units can use your Poppy Funds to make special donations to the President's Project.

With the Division meetings coming up in September, each Division President is encouraged to have a way of raising money for the President's Project.

At the Fall Conference, the Committee is having a "Country General Store". We are asking you to bring baked goods, canned goods and hand made crafts to sell.

Please be sure that the items you bring are bagged and priced.

We also are planning to auction three nice items and have a drawing on a special basket.

The Presidents Project Committee is a "team" and we are looking forward to helping President Joyce making her project a reality.

For God and Country,

Ann Moore, Chairman

Committee Members: Minnie Hughes, Bonnie Lee, Wanda Moore, Dot Raymer, Margie Fowler, Kaye Hirst, Carol Davis
